**Empower every person and every organization
on the planet to achieve more**

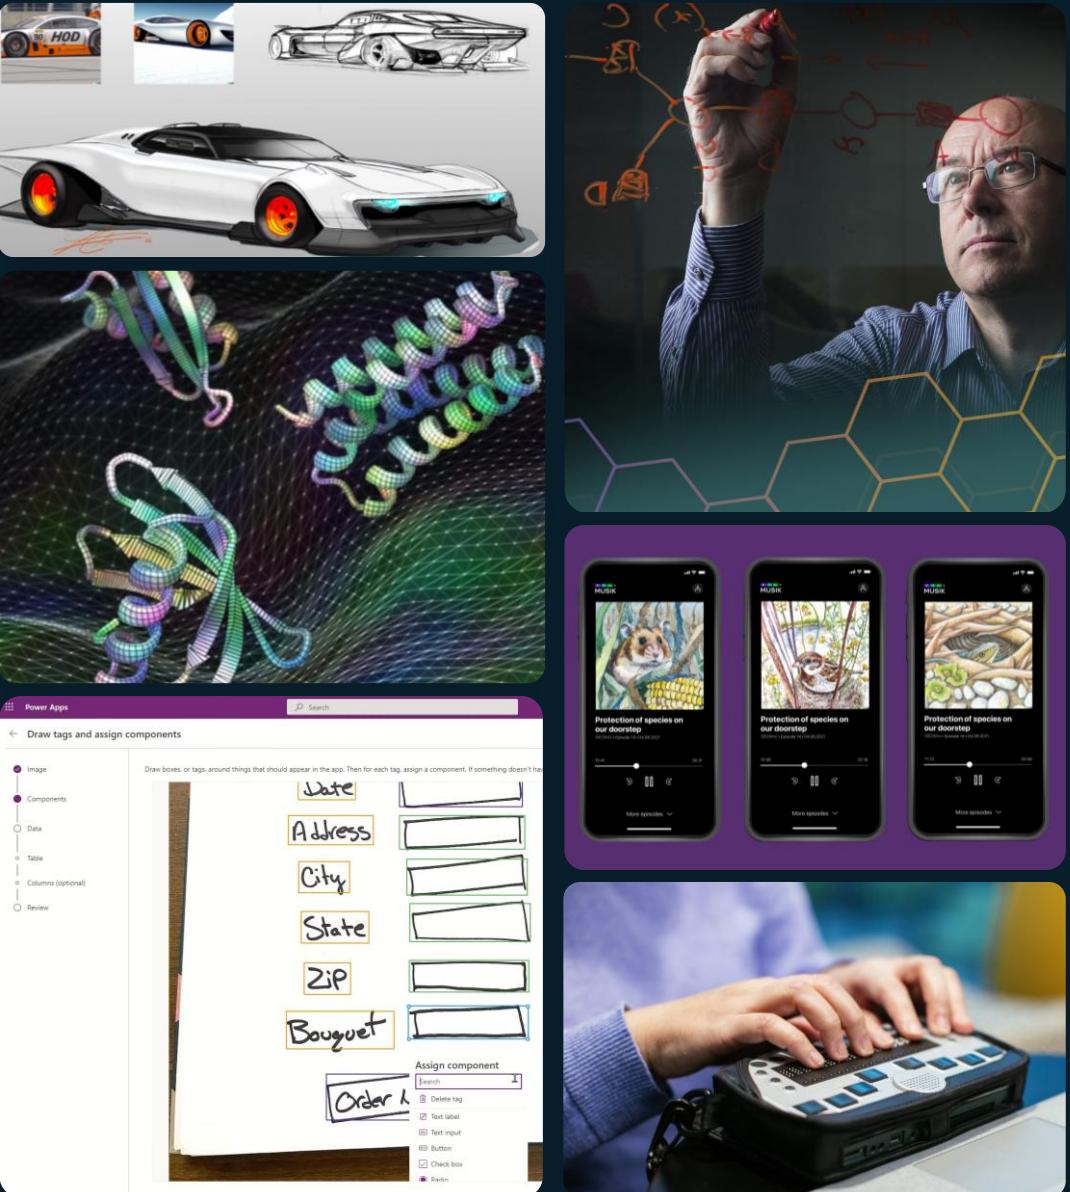

A collage of nine images illustrating various applications of AI across different fields:

- Top-left: Two women working at a desk with a computer monitor.
- Top-middle: A close-up of hands typing on a smartphone keyboard.
- Top-right: A person in a hard hat and safety vest inspecting solar panels.
- Middle-left: A group of young people gathered around a laptop.
- Middle-center: A close-up of yellow flowers with the text "Be you" written above them.
- Middle-right: Two people smiling, one wearing a shirt with "SM 04-2" on it.
- Bottom-left: Two women wearing face masks, one holding a tablet.
- Bottom-middle: Two men in traditional white clothing walking in a field, one looking at a phone.
- Bottom-right: Two people in a server room looking at a tablet.

AI is transforming every business, every organization. Now.

What can these Gen-AI services do?

- ✓ **Natural language chatbots:** everything from customer service to personalized tutoring to training for suicide prevention counselors.
- ✓ **Advanced search capabilities:** searching not just for links, but for answers.
- ✓ **Generate text:** emails, draft legislation, contracts, screenplays.
- ✓ **Real time translation, transcription, analysis, and summaries of content (audio, video, text).**
- ✓ **Image recognition and generation.**

Ensure that artificial general intelligence (AGI) benefits humanity.

Empower every person and organization on the planet to achieve more

AI Empowering
Knowledge Workers
everywhere →

A Copilot for every role and
every task

AI is already pivotal to how organizations operate. Generative AI has taken AI interest and capabilities to new levels

88%

of companies in **The Netherlands** use AI today.

- Actionable insights drive more accurate strategic decisions.
- Streamlined intelligent processes create more effective operations.
- New experiences for customers, partners, and suppliers create stronger engagement and better relationships.
- New ways of managing knowledge make employees more effective.

69%

of **Dutch organizations** are already using GenAI.

87%

of organizations in Europe believe GenAI has already disrupted their businesses or will significantly disrupt it within the next 18 months.

Successful organizations are making major gains with AI

35% of organizations in the Netherlands have implemented an AI solution in 6-12 months

60% of organizations in the Netherlands, saw a return on investment (ROI) from AI projects in less than 12 months (compared to global 39%)

Organizations in the Netherlands declared, on average, a **3.3-fold** return on each dollar spent on AI projects or initiatives.

GenAI projects leveraging pretrained models can deliver value in weeks.

However, some AI use cases — particularly predictive and interpretive AI use cases — require **custom model training, integration, and design**.

It is important to strike a balance between swift results and the value that customization can deliver.

Addressing key AI challenges: skills, control, and value

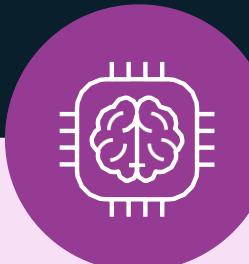

30%

struggle to make a compelling business case for AI.

25%

of Dutch organizations are concerned about the cost of AI.

40%

of Dutch organizations worry about data or IP loss in AI projects.

39%

lack sufficient data governance.

46%

lack specialized personnel with AI implementation skills.

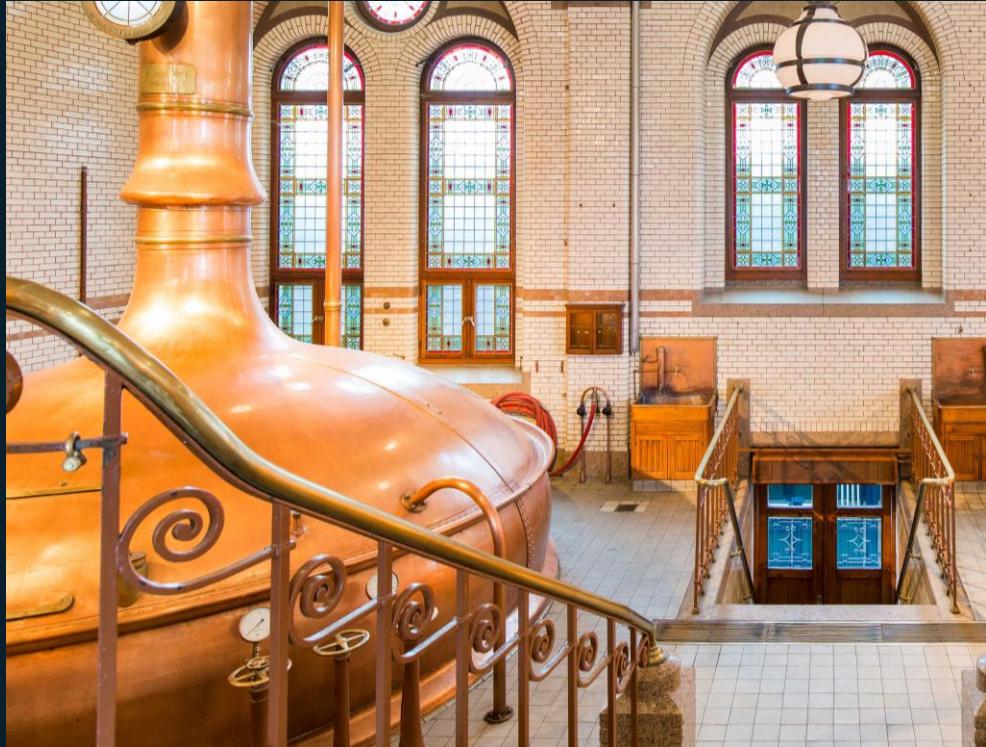

39%

of Dutch organizations lack skills needed to learn and work with AI.

HEINEKEN connects employees with information across the company using Azure AI services

"With Azure OpenAI Service, we get the innovation of OpenAI with the scalability, flexibility, and high security of the Azure platform."

—Mark Slijpen, Manager Global Portfolio Digital Technology, HEINEKEN

How Albert Heijn is using Azure OpenAI to reduce food waste and help its customers eat healthy

"At Albert Heijn, our job is to fill six million plates with food every day, helping our customers to eat better while also reducing food waste. In collaboration with Microsoft, we're using AI and, Generative AI to drive vital transformation across all sorts of segments and operations – from personalization to forecasting and so much more."

Noortje van Genugten, VP, Product Operations at Albert Heijn

ABN AMRO believes in GenAI and enables it structurally and responsibly

Agent Assist provides users with a summary of the conversation & easy access to the knowledge base

A screenshot of the Agent Assist application interface. At the top, there is a navigation bar with tabs: "admin feedback", "Admin Labeler", "Advisor Assist CCO", "Analyst Assist DFC", and "Chat". The main area is divided into two sections. On the left, under "Summary of your conversation", there is a text box containing a summary of a customer interaction in Dutch. Below the text box are buttons for "zij", "hij", and "shorten". At the bottom of this section are buttons for "Copy summary" and "Show transcription". On the right, under "How was the summary?", there is a message asking for user input about the summary's helpfulness. It includes "Tell us more" and "Send feedback and restart" buttons, along with thumbs up and thumbs down icons.

Highlights of the pilot so far (300 active users)

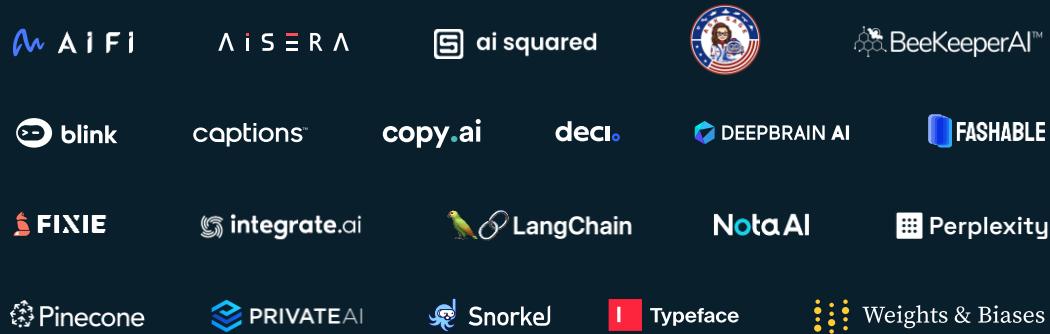

- Customer Experience: employees report **more time and focus to listen to clients**
- Product stickiness is high. **90% product retention rate over past 6 months (excluding re-assignments and exits)**
- Usefulness of AI enabled summarization is proven. **On average 15k summaries are made weekly, with ±80-90% being first-time right (as measured by thumbs up in the app)**
- Feasibility of using this technology has been proven. **All services are run from our Azure environment. +99% availability over entire pilot and 99% success rate on API calls**

"We will continue to invest in our expertise and offer the best products and services to support our clients. We will also keep investigating in areas such as **generative artificial intelligence**; these investments allow us to optimise our internal processes while freeing up staff to serve clients better"

– Robert Swaak, CEO at ABN AMRO, Annual Report 2023

KELLINE, N.Y. Andrew Yang travels around the country warning of a dystopian "Mad Max"-like future, yet dropping dry one-liners along the way like he's at a comedy open-mike.

His approach — doom and dad jokes, plus his promise to give every American adult \$1,000 per month — are increasingly winning the Democratic nomination candidate the favor of smaller, more vocal segments of

Societal Impact

Will AI Take All Our Jobs?
Or Will AI lead to Crippling
Inequality? Or Worse?

Yang said officials offered three responses: a refusal to discuss the problem, proposals to study it further, and retraining millions of workers for new jobs.

"The last one sounds halfway responsible," Yang said, before pointing to studies that found government-funded retraining programs for displaced manufacturing workers had a success rate of 15 percent. "They're a total

Responsible AI at Microsoft

We are committed to the advancement of AI driven by ethical principles that put people first.

TOOLS

AND

WEAPONS

THE PROMISE AND THE PERIL
OF THE DIGITAL AGE

BRAD SMITH

AND CAROL ANN BROWNE

FOREWORD BY BILL GATES

Microsoft Responsible AI Principles

Designing solutions worthy of trust

Fairness

AI systems should treat all stakeholders equitably and should not reinforce undesirable stereotypes and biases.

Transparency

AI systems and their output should be understandable to relevant stakeholders.

Accountability

The people who design and deploy AI systems must be accountable for how their systems operate.

Reliability

AI systems should be designed to perform safely even in the worstcase scenario.

Privacy & Security

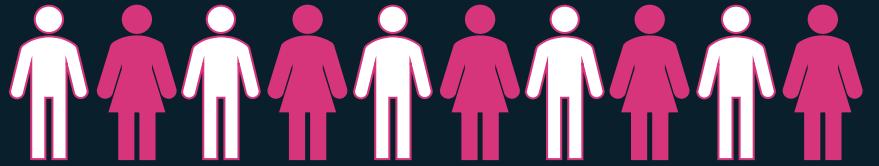

AI systems should protect data from misuse and ensure privacy rights.

Inclusion

AI systems should empower everyone, regardless of ability, and engage people by providing channels for feedback.

Dream Space

- 16% of all technical roles in the Netherlands are performed by women
- 15.5% of all graduates majored in STEM (European average: 21.9%)

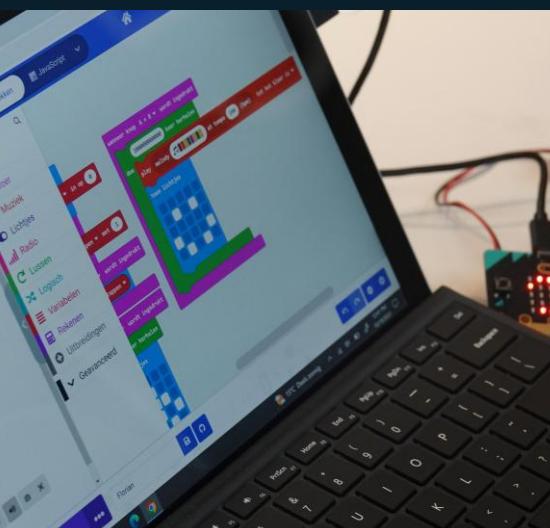

Our goal at Dream Space: close the skills & gender gap

Microsoft Dream Space utilizes the **best of Microsoft technology** to provide **immersive, research-based STEM experiences** for students and teachers to enhance their STEM skills alongside **crucial social-emotional skills** such as empathy, creativity, ethical decision making and collaboration.

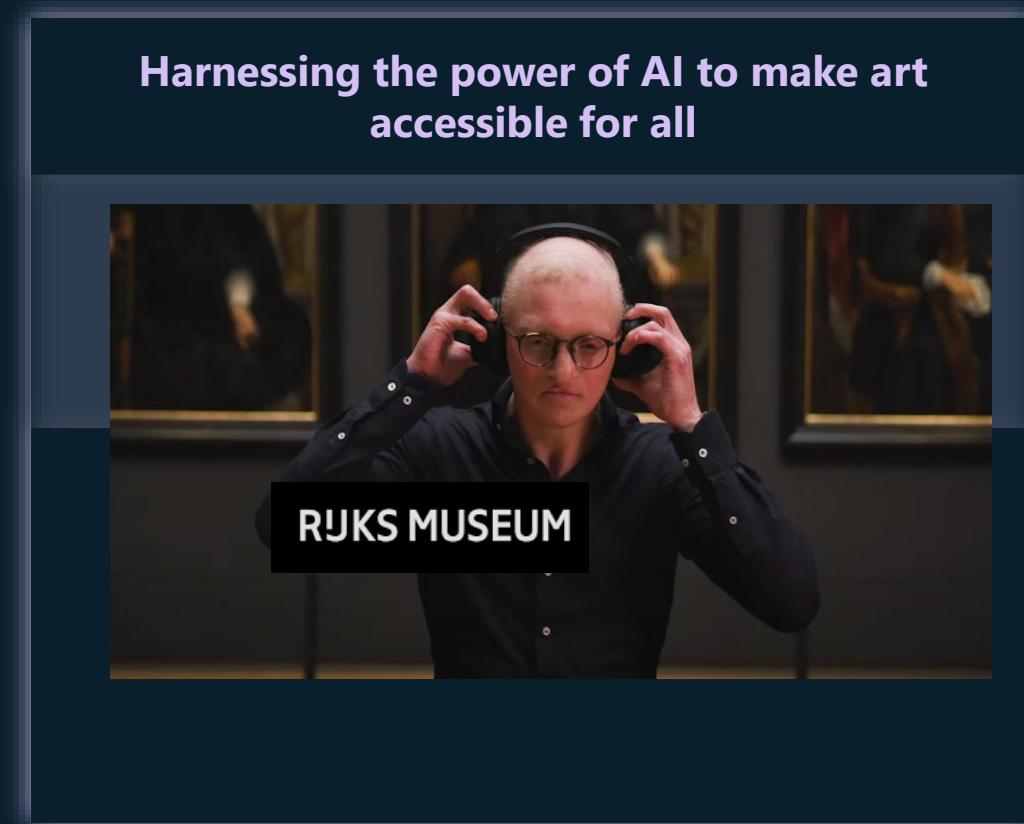

Our ambition

2025: total reach **20k students** (>50% female participation), **1k teachers**

2029: total reach **500k students** (>50% female participation and >33% disadvantaged schools), and **5k teachers**

Meeting notes

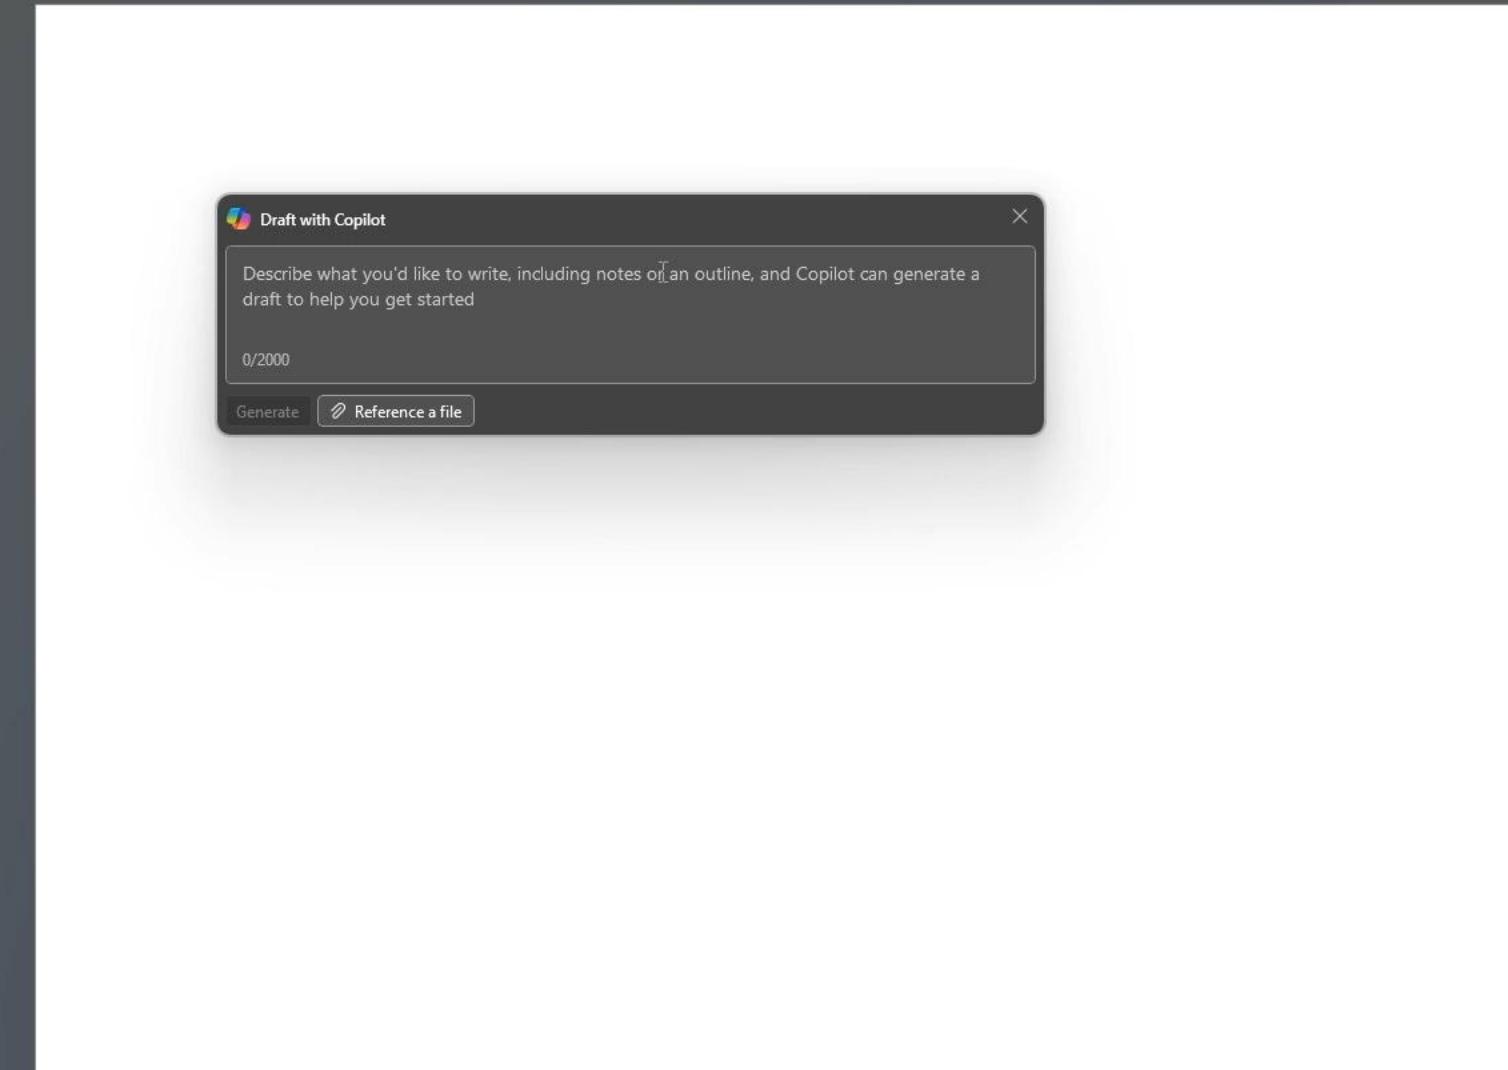

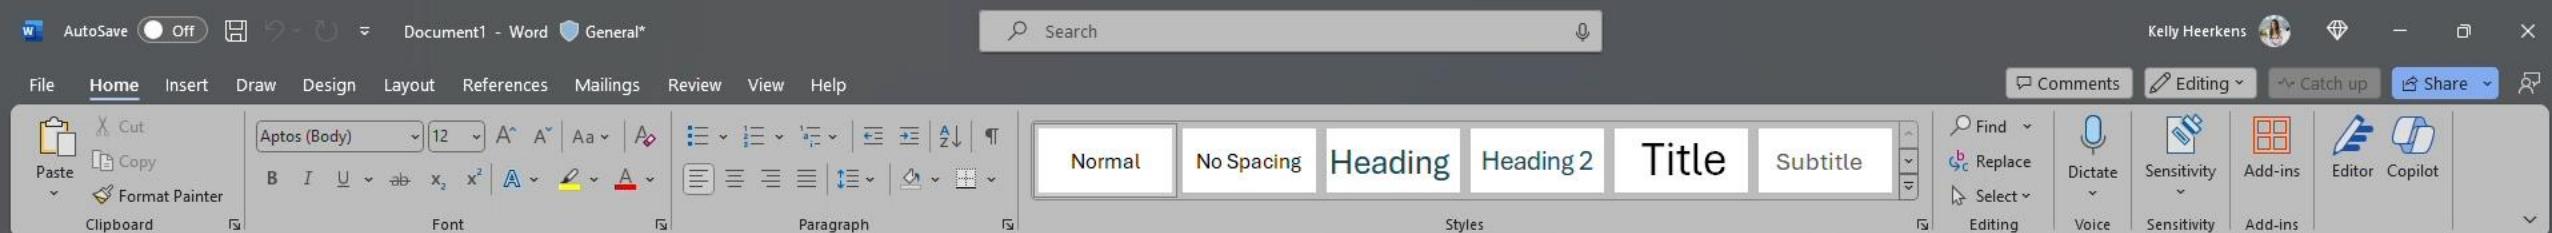

- **Event briefing for Andre Kuipers:** Kelly, Jurrit and Meagan agreed on the main objectives, messages and logistics for Andre's keynote speech at the Breaking Boundaries event.
- **AI and space exploration examples:** Jurrit will provide Andre with relevant examples of how AI and space exploration are related and how they can inspire innovation and risk-taking.
- **Communication and rehearsal strategy:** Meagan will liaise with Andre and Lisanne Brons to ensure consistency and alignment across all channels and coordinate a rehearsal for Andre.
- **Event impression video and photography:** Meagan will also oversee the creation of the event impression video with Lisanne Brons and work with the photography team to capture the key moments of the event.
- **Onsite requirements and travel arrangements:** Kelly will draft the briefing document for Andre and provide him with the onsite requirements and travel arrangements.

Are these notes useful?

Follow-up tasks

- **Briefing document:** Draft the briefing document for Andre, highlighting the events, objectives, session details and his role in inspiring the audience (Kelly)
- **AI innovations and space exploration examples:** Compile a list of AI innovations and space exploration examples that Andre can reference in his
